

# Houghton WTW – Relocation of Actuators

## CASE STUDY

**Sector**  
Water - Industrial

### Installation

Relocation of supply to inlet and outlet actuators

### Value

£15,000

## CONFINED SPACE WORKING

This project was concerned with the relocation of two inlet actuators and two outlet actuators.

Due to the works location specialist confined space working requirements were put in place including Engineer trained to City and Guilds Confined Spaces. Specialist Risk Assessments and Method Statements provided and safe work equipment.

Installation of new cabling and isolators .

Installation of new cable containment.

Reconnect supply to actuators.

Installation of new LED Emergency Lighting to the chambers.

Test and Inspection prior to handover.
