Electrical installation to serve High Caustic Dosing, Low Caustic Dosing and Hypo Chlorite Dosing Meter installation

Value

£6880

SPECIALIST CABLING

FLOW METER CONTROLS

This project was to provide new power supplies to new dosing meters installed on site.

The works comprised of installation of new mounting and enclosures for the flow meters. Fitting of the flow meters supplied by United Utilities. Installation of new cabling and superseal switches for the same.

Installation of new GRP enclosure to house new Merlin Gerin consumer unit with appropriate isolation. Installation of 5 pair screened cables from flow meters to flow controls in valve house.

Test and Inspection prior to handover.
